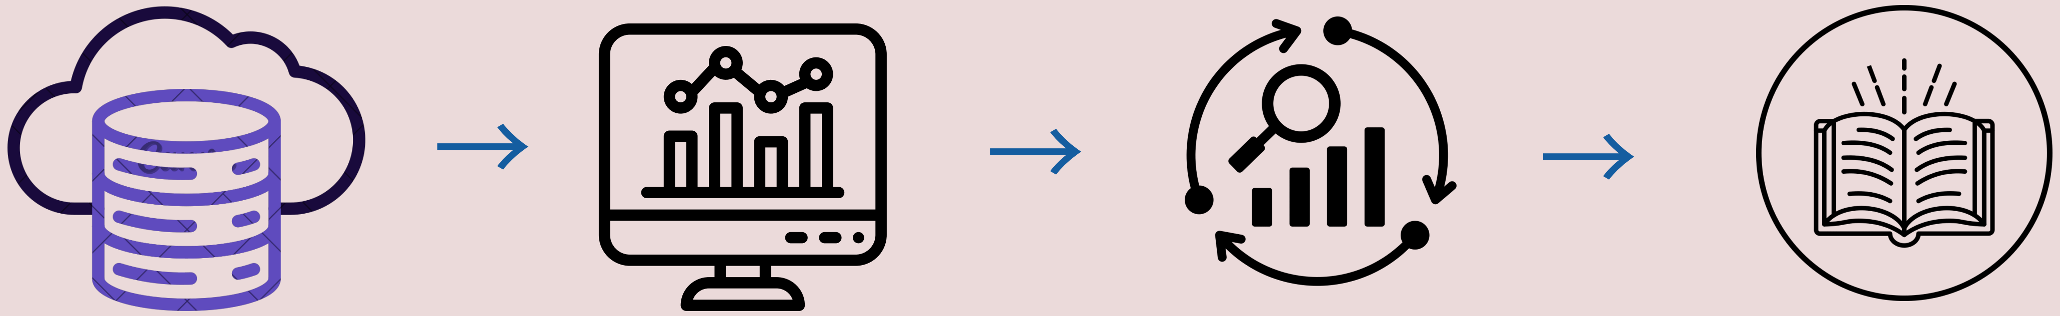
WELCOME TO ACCESS 6.0 SAP – DATA SCIENCE TRACK

- *ACCESS 6.0 Skills Acquisition Program*
- *Data Science Track* 🧠💻
- *Instructors: Miriam and Favour*
- *Duration: 8 weeks (2 sessions/week)*
- *Platform: Google Colab + VS Code + GitHub + Streamlit*

WHAT IS DATA SCIENCE?

- *The art and science of turning raw data into insights and actions.*
- *Combines Statistics, Programming, and Business Knowledge.*
- *Involves: data collection → cleaning → analysis → modeling → storytelling.*



THE DATA ECOSYSTEM

Data Analytics

Data Science

Data Engineering

Machine Learning

Artificial Learning

DATA SCIENCE IN ACCOUNTING & BUSINESS

- *Auditing: Detect unusual transactions automatically.*
- *Financial Forecasting: Predict future revenues or cash flow.*
- *ESG Analysis: Evaluate sustainability metrics.*
- *Risk Management: Model credit or loan defaults.*
- *Decision Support: Turn complex data into visual insights.*

COURSE ROADMAP

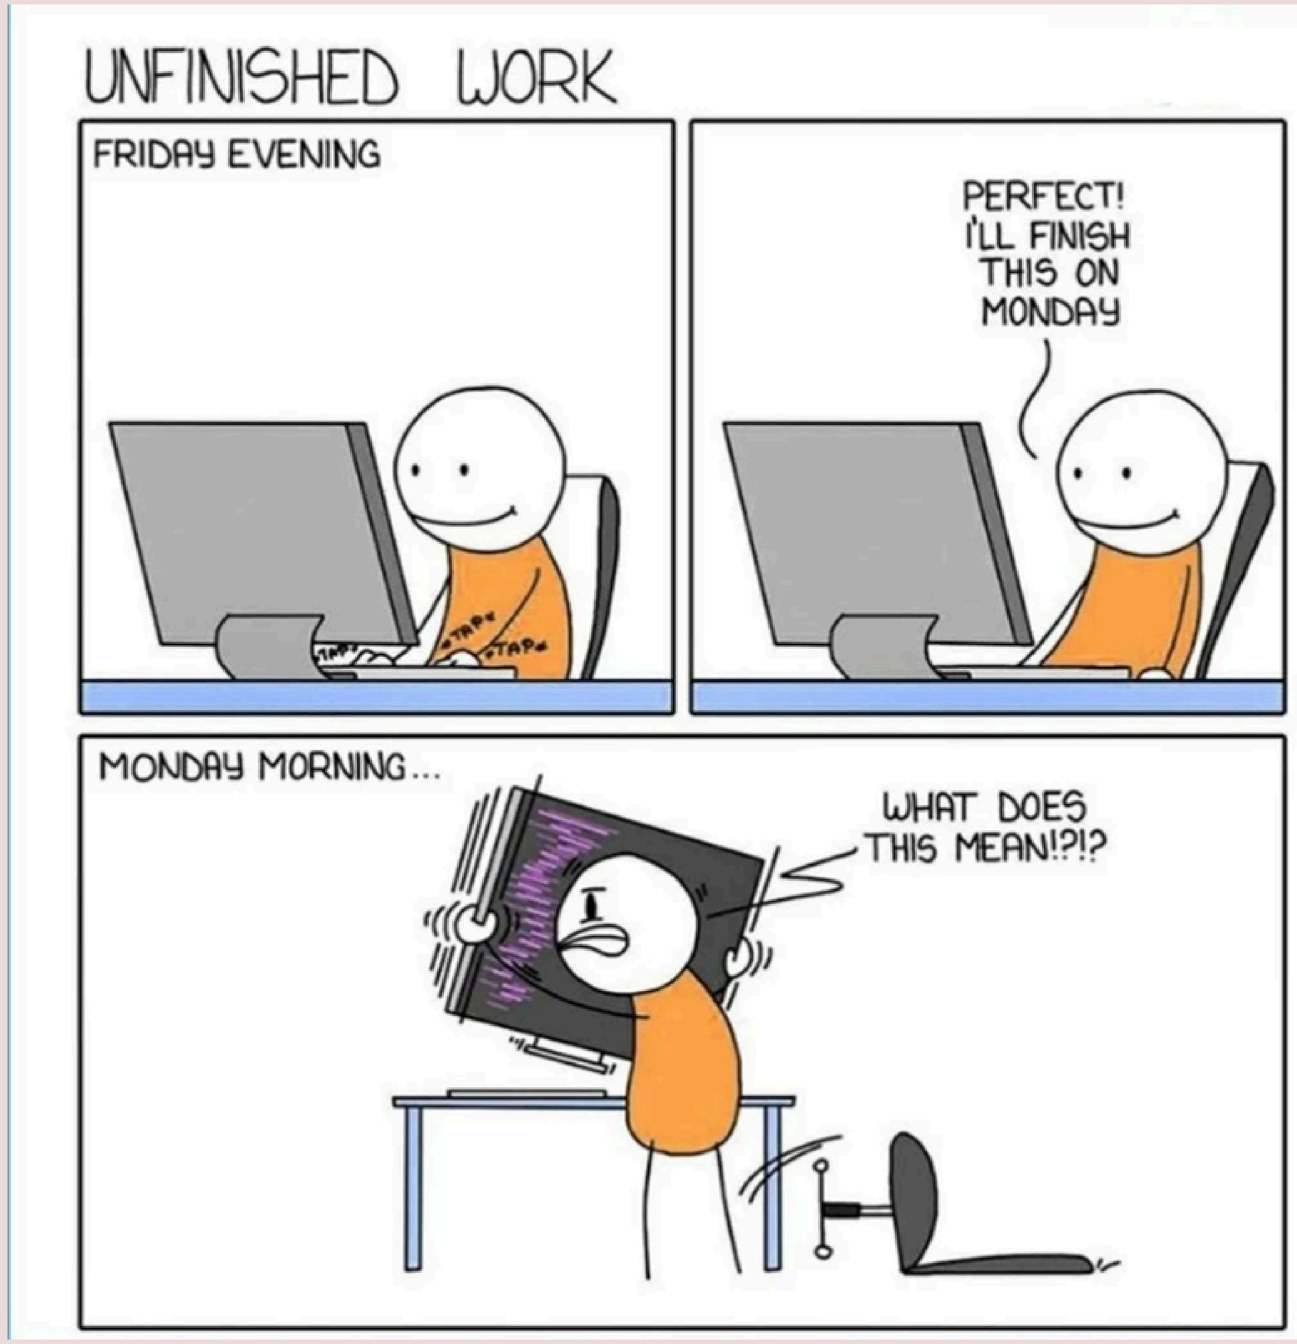
Phase	*Focus*	*Outcome*
Weeks 1–4	*Foundations (Python, Pandas, EDA)*	*Learn data handling*
Week 5	*Mini Capstone*	*Apply early concepts*
Weeks 6–8	*Modeling & Deployment*	*Build and deploy an app*

THE FINAL CAPSTONE PROJECT

- *Build and deploy a Streamlit web app using real data.*

- *Choose one track:*
  – Track 1: ESG & Financial Performance (Regression).
  – Track 2: Telecommunication Churn (Supervised and Unsupervised Learning).

- *Deliverables:*
  – Clean dataset
  – Working model
  – Deployed app on Streamlit Cloud
  – GitHub repository + 5-slide presentation



WHY GITHUB?

- *Portfolio: Showcase your projects publicly.*
- *Collaboration: Work like real-world data teams.*
- *Version Control: Save and revert code easily.*
- *Visibility: Recruiters love active GitHub profiles.*

GITHUB SETUP (LIVE DEMO)

- *Go to https://github.com*
- *Sign up / Sign in*
- Download VS Code
- *Create a README.md file*
- *Write a short intro (Name + Why you joined)*
- *Commit and push changes*
- *Share your repo link on the class sheet*

DISCUSSION – LET'S REFLECT

- *Why did you join the Data Science track?*
- *How do you see data transforming the accounting field?*
- *What's one skill you hope to gain by the end of this program?*

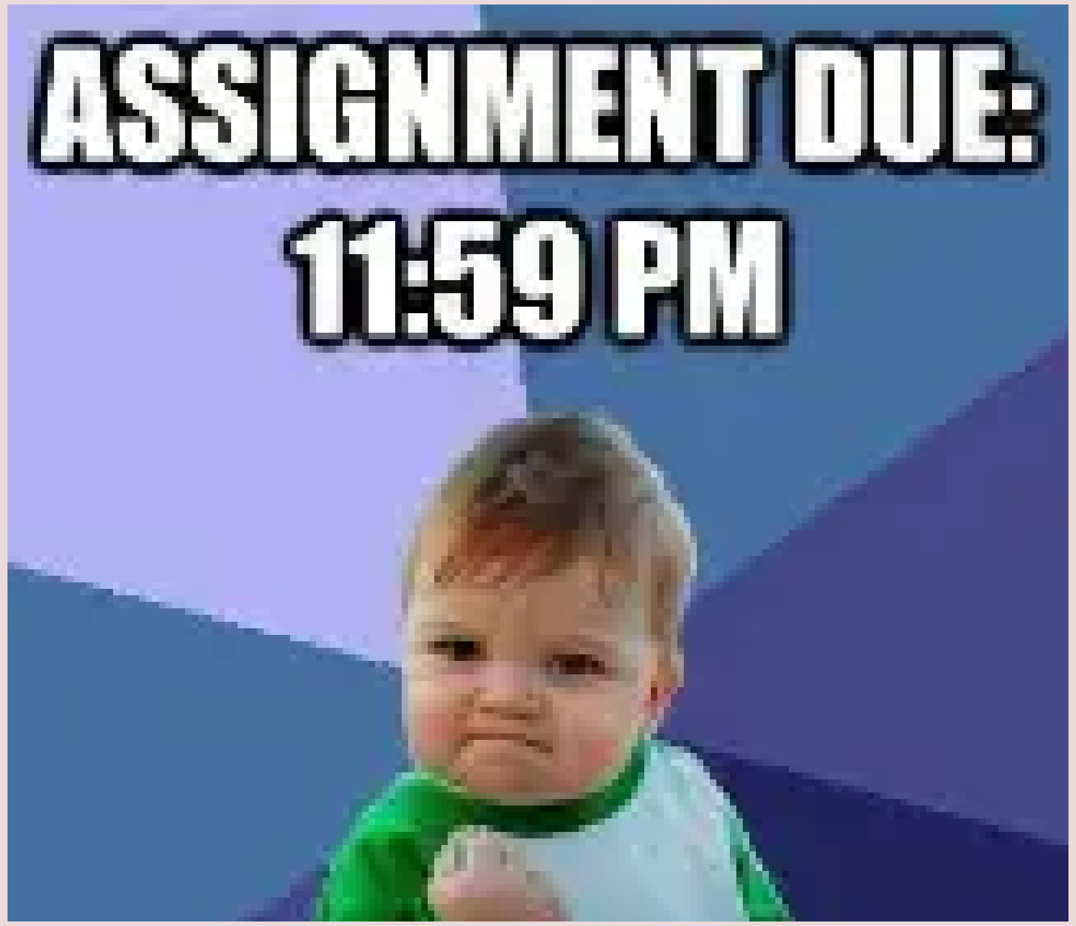
ASSIGNMENT

- *Create your GitHub account (if none).*
  ✅ *Create your own repo that would contain your assignment solution for each week*

  ✅ *Add a README file with:*

  - Your description

  ✅ *Push to GitHub.*
  ✅ *Post your repo link in the class sheet.*



Time to
wrap it up
